

TOP LANGUAGES BY STATE

Languages in the United States: 322

24

Languages recorded in all 50 states and Wash., DC

The chart below identifies the number of states where a given language was recorded as being spoken at home (subject to Census confidentiality requirements), as well as the number of U.S. states where this language was among the top 10 languages in a given state. In addition, the number of state where each language ranked as the most common, 2nd most common, 3rd most common, etc. is presented.

For example, there were 51 states in the United States where German speakers were recorded, including 45 where German ranked among the 10 most common languages spoken in the state. Of those, German was the 2nd most common language in 2 states, 3rd most common in 18 states, 4th most common in 17 states, etc.

Total number of "states" (states, commonwealths and the District of Columbia) in the United States is 51. Totals for rankings may add up to more or less than 51 due to ties. Some languages were not noted in states because of Census confidentiality protections. Languages with zero "total" were recorded in the national totals, but were not listed within a state due to Census confidentiality protections.

60

Languages that placed in the 10 most common in at least one county
